INTRODUCTION

ABOUT US

VISTAL is a prominent aluminium window and door manufacturer based in Indonesia. We are renowned for our unwavering dedication to excellence. We focus on providing outstanding quality at economical prices.

As a subsidiary company of DAMAI GROUP, one of Indonesia's largest aluminium extrusion manufacturers, our access to cutting-edge technology and resources sets us apart in the industry. With advanced factories located in North Sumatera and West Java, we are equipped to deliver products of unmatched precision and durability.

At VISTAL, our team of skilled craftsmen and engineers collaborates closely with homeowners, architects, designers, contractors, and developers to create top-tier solutions that meet the unique vision of each project. We understand the transformative power of windows and doors in any space, and our products reflect our dedication to quality and innovation.

Whether you are a homeowner seeking to elevate your living space, an architect or designer looking for innovative solutions, or a contractor or developer working on a new project, VISTAL is your trusted partner. Join us as we redefine excellence in the aluminium window and door industry.

WHY US?

We as aluminium window and door fabricator that extrudes our own aluminium has several strengths, including:

- **Control over Quality and Consistency:** By extruding the aluminium ourselves, we have complete control over the quality and consistency of the material. This ensures that every window and door produced meets the same high standards of quality and performance.
- **Customization Options:** Extruding the aluminium allows for greater customization options, as we can produce profiles that meet specific design requirements and specifications.
- **Cost Savings:** By controlling the extrusion process, we can reduce costs by eliminating the need to purchase pre-extruded aluminium from third-party suppliers.
- **Speed and Efficiency:** Extruding the aluminium in-house allows the fabricator to streamline the production process and reduce lead times, as we do not have to rely on external suppliers.
- **Improved Customer Satisfaction:** By having control over the entire production process, the we can respond quickly to customer needs and provide a higher level of customer service and support.
- **Overall,** having the ability to extrude our own aluminium gives us greater control over quality, cost, and production, which can result in improved customer satisfaction and a competitive advantage in the market.

OUR PRODUCT STRENGTH

- Features a modern design with a sleek profile, boasting a 45 mm sightline/interlock that offers unobstructed views of the surrounding landscape.

GENERAL WINDOW

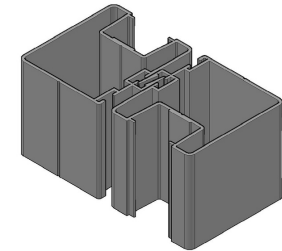

VISTAL

- Special design incorporates hidden top and bottom stiles within the frame, providing a seamless look and maximizing the breathtaking views of the outdoors.
- Includes high-quality seals and gaskets, ensuring superior insulation and weatherproofing to maintain a comfortable indoor environment while keeping the elements at bay.
- Rollers feature stainless steel construction and are equipped with two wheels each, offering a weight capacity of 80 kg per sash.
- A sealer pad is used for metal joints, and the entire installation process is carried out at the factory.
